MAGIC NUMBER TRICK:

Have a friend (or 'audience member') pick a number between 10 and 1000. Then ask him/her to add each "numeral" within the number together (example: say 164 is selected, add $1+6+4 = 11$). Now have them subtract that result from the original number (i.e., $164-11 = 153$). Then ask the person to add up the "numerals" in the new number. At this point you predict the answer will be either 9 or 18. **MAGIC!**
(the answer will always be 9 or 18).
